

Achieve Accuracy & Accountability

SCLIntra:

- Extends tracking visibility to internal mail and parcels
- Identifies who's accountable regardless of delivery agent.
- Tracks multiple items in a single shipment.
- Is easy to deploy, use and manage.
- Has an intuitive interface to access, store, and reuse information quickly.
- Is versatile enough to accommodate a range of work preferences and styles configurable for each user.

Printing Options

It's been over a decade since SCLLogic launched our tracking solution, SCLIntra. Much has changed since its inception including the power and variety of hardware available to use with our system. As a Zebra Certified Reseller, SCLLogic is committed to keeping abreast of the latest bar code printing technologies on the market and providing our customers with the information they need to keep their valuable hardware and peripherals current.

Among the printing solutions SCLLogic recommends to complement your SCLIntra tracking system are:

Zebra Technologies GK420d™: Space-Saving, User-Friendly Desktop Bar Code Printer

The direct thermal Zebra GK model is your best value in a basic desktop thermal printer. Its enhanced performance delivers fast print speeds of up to 5 inches per second and fast first label out. USB and serial connectivity interfaces come standard, or use the ZebraNet® 10/100 Print Server option for distributed printing.

The GK420d is ideal for applications requiring a space-saving, desktop-size printer. This user-friendly printer delivers optimal performance in today's on-demand desktop labeling applications like shipping and receiving, inventory control, healthcare, and medical laboratories, transportation and logistics, and e-commerce postage. The durable GK420d has a sturdy construction, making this flexible, reliable, and affordable printer a smart investment.

Zebra Technologies TLP2824™: Ideal for Asset Labeling

The TLP 2824 has one of the smallest foot prints of any two-inch printer without sacrificing quality or speed. It fits into areas other printers cannot, withstanding rough handling and integrating easily into a wide range of applications. The TLP 2824 excels in delivering printing solutions for business and professional offices, including shelf labeling, product marking, healthcare specimen labeling and patient tracking, inventory and asset management, shipping, and file folder labeling.

Zebra Technologies QL220™: Lightweight and Rugged Mobile Printing

The compact and rugged mobile QL 220, with QuickLink connectivity, is the best choice for printing 2" (50.8 mm) flawless labels and receipts. At 1.04 lbs, the lightweight QL 220 is the smallest network addressable printer in the AIDC Industry. This 2" (50.8 mm) direct thermal mobile printer has been designed with the most advanced technology in rubberized over-molding to maintain both rugged construction and minimal weight.

We will gladly discuss your options with you and help you determine the best models to meet your requirements. We will provide you with information regarding any current printer service contracts you may carry with us and after upgrading, we will send you an updated service contract that includes your new equipment serial numbers.

About SCLLogic

SCLLogic is the leader in package tracking solutions. We design, develop, deploy and support our software. SCLIntra Package Tracking Solutions are available for purchase, rental or lease; on premise or hosted; you decide, we deliver.
