## **Premier Health Benefits Provider Expands SCLogic Package Tracking System Company-wide**

ANNAPOLIS, MD April 28, 2010 — SCLogic, a leading provider of mobile enterprise package tracking software systems, today announced an agreement to expand its SCL*Intra*™ enterprise package tracking solution across multiple locations in 14 states at one of the country's largest health benefits providers. The expansion of the system includes SCLogic's largest order to date of Janam rugged mobile computers. A certified Janam value-added reseller, SCLogic will deploy its application on Janam XM66 mobile computers.

The customer, a major player in the insurance industry, will replace many outdated standalone tracking systems and paper-based processes with a network-based SCLogic mobile computer and barcode tracking system that will expedite inbound, outbound and internal mail and package delivery.

"The customers' decision to expand our tracking system to almost all of its locations is a testament to expedited delivery, increased efficiency, better tracking and real-time proof-of-delivery of mail and packages at the insurance provider's pilot locations," said Michael B. Saldi, President of SCLogic.

### About SCLogic

Founded in 1996 by Michael B. Saldi, SCLogic is a leading provider of innovative mobile enterprise tracking solutions that leverage the latest barcode scanning, printing, mobile computing and wireless technologies. The company has thousands of enterprise, government and university users around the world.
