

How your workflow fits on Intra's in-building logistics platform

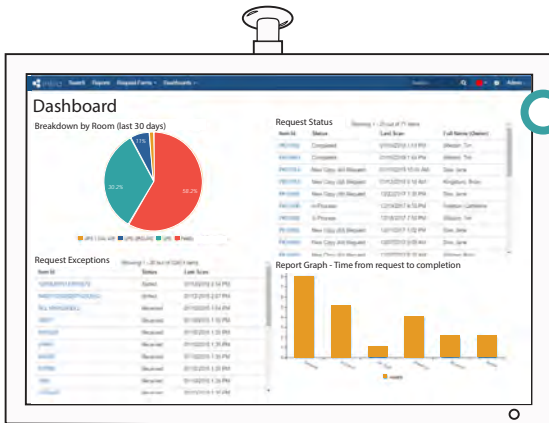

A Home Base to Fit Everyone

Intra's web portal provides customized access to items, service requests, reports, searches, and more based on user permissions. Connect and share data with legacy facilities/HR/Finance applications using our Intra Kit API and open them to your users.

Manage Your Services

Intra gives you the power to build, view, approve, fulfill, and move processes through to completion for all the in-building logistics you manage.

Insight You Can Use

Use the data that Intra collects to create metrics that give valuable, real-time statistics on daily operations, SLAs, trends, and more. Use pre-loaded reports or create your own, customizing not only individual reports but entire dashboards with rich, interactive graphs and charts that can be viewed privately or displayed on your department's main floor.

Mobile software for the mobile workplace

Intra's mobile applications give couriers the ability to collect service point proof-of-completion/delivery, managers the visibility to track and fulfill items and requests, and users the power of modern request forms that are editable, allow attachments, and send automatic email/text notifications.
